Making the References List

APA is a complex system of citation. When compiling the reference list, the strategy below might be useful:

1. Identify the type of source: Is it a book? A journal article? A webpage?
2. Find a sample of citing this type of source in the textbook or in the OWL APA Guide:
<http://owl.english.purdue.edu/owl/resource/560/01/>
3. "Mirror" the sample
4. Make sure that the entries are listed in the alphabetical order and the subsequent lines are indented (Recall References: Basics)

In-text Citations: Basics

In-text citations help readers locate the cited source in the References section of the paper.

Whenever you use a source, provide in parenthesis:

- the author's name and the date of publication
- for quotations and close paraphrases, provide the author's name, date of publication, and a page number

In-text Citations: Formatting Quotations

When quoting, introduce the quotation with a signal phrase. Make sure to include the author's name, the year of publication, the page number, but keep the citation brief—do not repeat the information.

Caruth (1996) states that a traumatic response frequently entails a "delayed, uncontrolled repetitive appearance of hallucinations and other intrusive phenomena" (p.11).
